SUBJECT INDEX

Achievement gain, measurement of school effectiveness 129
Adaptive teaching, innovation 334–344
Adult literacy assessment 212
Advanced Placement Examinations, item format and gender differences in mathematics achievement 79
African students, mathematics achievement 62–75
Aggregation rules 264
Alternative assessment system, project-based 171–188
And rule 279
Assessment
  portfolios 193–208
  prior knowledge, internet based 245–256
  self-assessment 318
  user validity 316–330
Assessment coordinators, training needs 231–243
Assessment instrument, reality of developing 211–227
Attitude, mathematics achievement, TIMSS 19, 24, 27–39, 70
Australia, mathematics achievement, TIMSS 3–5, 9–25
Australian Second Language Proficiency Rating Scales (ASLPR) 213
Average rule 279

Basic Skills Agency (BSA) 211, 214
Beliefs, mathematics achievement 27–39
Between-grade definition of school effectiveness 129–131, 134
Books in the home, mathematics achievement, South Africa 69
Brazilian National System of Evaluation of Basic Education
  context, origins and developments 105–109
  general aspects 114–118
  impact on state educational management policies 113–114
  methodology 109–113
  relevance 118–121

Case study, performance assessment 179
Community expert assessment 184
Concerns of teachers during innovation 331–350
Concerns-Based Adoption Model (CBAM) 332, 333, 342
Constructivism, prior knowledge 246
Co-ordination, departments, effectiveness 352, 353, 355, 356
Curricular materials, opportunity to learn 298
Curriculum, mathematics, TIMSS, Australia 12–14
Cyprus, efffect of attitudes and beliefs on mathematics achievement 27–39

Departmental effectiveness, secondary education 351–369
Distance education, prior knowledge assessment 245
Dossier portfolio 194, 198

Ecological validity 316
Effectiveness, schools
  departments 351
  measurement 127–140
Employment, self-assessment, user validity 315–330
English as a foreign language
  assessment instrument 211–227
  self-assessment, user validity 315–330
Essential Academic Learning Requirements (EALRs) 233
Expert judgement
  fuzzy logic 274
  school rankings 264, 281
External evaluation 183

Family background, mathematics achievement, TIMSS 4
  South Africa 68
Feedback
  interactive using video 385
  portfolios 193–208
Focalization 382
Fourth Generation Evaluation 173
Fuzzy logic, aggregate school outcome measures 271–282, 284–287

Gender, mathematics achievement
  Australia 18
  significance of item format 79–88
Geography achievement, departmental effectiveness 355–369

Hermeneutics, video image 383
Higher education, self-assessment, user validity 315–330

IEA, TIMSS reports 5–7
Implementation of innovations, meeting the concerns of teachers 331–350
Indicators, school profiles 143, 145–148
  identification 148
  input-outcome 150, 153–155
  methods for summarizing data 156–159
  quality 149
  research 161
  stakeholder informational needs 151–153
Industry-environment project, alternative assessment 171, 176
Innovation, implementation, meeting the concerns of teachers 331–350
Interactive feedback using video 385
Internet, prior knowledge assessment 245–256
Interpersonal intelligence 326
Iowa Tests of Basic Skills (ITBS) 233

Japan, effects of attitudes and beliefs on mathematics achievement 27–39

Language, mathematics achievement, TIMSS 19, 70, 72
Language arts programs, opportunity to learn 302
Language competency, assessment 212
Language learning, self-assessment 315–330
Learning portfolio 194, 198
LISTREL, attitudes and beliefs in mathematics achievement 32, 33
Literacy, assessment 212–227
Low performance schools, identification 259–287

Mathematics achievement, TIMSS
  attitudes and beliefs 27–39
  internal and external factors 1–5
  item format and gender differences 79–88
  lower secondary level in Australia 9–25
  middle school in South Africa 61–75
  national option mathematics test 43–59

Narrative 382
National option test for mathematics 43–59
Netherlands, TIMSS national option mathematics test 43–59

Open-book assessment 91
  assessment procedures 93
  construction of exercises, assignments and tests 98
  ecology of teaching and learning 97
  impact on textbooks 100
  students' reactions 95, 96
  varieties 99
Open Court 302–304
Open notebook 99
Open University of the Netherlands (OUNL), internet based prior knowledge assessment 245–256
Opportunity to learn (OTL)
  measure of policy effectiveness 289–309
  measuring 292
Opportunity to learn standards, adaptive teaching 336, 337
Organisational effectiveness 353
Or rule 278

Paraprofessionals 293, 294, 297
  classroom curriculum 305
  rapport with students 301
Parents, school profiles 151
Parents' education, mathematics achievement, South Africa 69
Performance, public schools, U.S. 259–287
PLSPATH, Australian TIMSS 23
Policy effectiveness, opportunity to learn as a measure 289–309
Portfolios 182
  feedback in construction 193–208
Prior knowledge, internet based assessment 245–256
Program evaluation, video use 379–391
Project-based alternative assessment system 171–188
Public schools, U.S., performance 259–287

Reading Recovery, opportunity to learn 293–309
Reality 377
  representations of 380
Reflection 373
  kinds 375
  promoting 378
  role of video 381–391
  source 376
Reflective portfolio 194, 198
Reforms, performance-based 259
Reinforcement, mathematics achievement 38
Rendering 379, 380

SAEB Project 105–121
School assessment coordinators, training needs 231–243
School effectiveness
  departments 351
  measurement 127–140
  process indicators 154
School profiles 143–148
  designing for stakeholder audiences 159–160
  implications 160
  methods for summarizing data 156–159
  purpose 148
  quality of indicators 149–155
  stakeholder informational needs 151

School Report Card Project 144–147, 168
Schools, low performance, identifying 259–287
Science-Technology-Society, project-based learning 171, 178, 187
Self-assessment
project-based study 185
user validity 315–330
Self-concern 332, 333, 342
Self Test 248
Socioeconomic status, mathematics achievement, TIMSS 4
Australia 19
South Africa 68
South Africa, mathematics achievement, TIMSS 3–5, 61–75
Space, learning opportunities 299, 300
Stakeholders, school profiles 151
Standards
for assessment 213, 216
training needs of school assessment coordinators in Washington State 231–243
Statistical control method, estimation of school effectiveness 128, 134
Streaming, Australia 10
Structural equation model, mathematics achievement 30
Support programme, implementation of innovation 335–344

Teachers concerns of implementation of an innovation 331–350
Teacher-student rapport, opportunity to learn 301
Tennessee Value-Added Assessment System (TVAAS) 159
Test format, relationship with gender differtences in mathematics achievement 79–88
Test of Adult Basic Education (TABE) 212
Textbooks, open-book assessment 100
Text, video 381
TIMSS, mathematics achievement
attitudes and beliefs 27–39
internal and external factors 1–5
item format, gender differences 79–88
lower secondary level in Australia 9–25
middle school in Southrh Africa 61–75
national option mathematics test, Netherlands 43–59
Title 1 policy effectiveness 289
opportunity to learn as a measure 291

United States
mathematics achievement
effect of attitudes and beliefs 27–39
interaction between item format and gender differences 79–88
school profiles 143
User validity, self-assessment 316–330

Validity of assessment 316
Video, program evaluation 379–391

Washington Assessment of Student Learning (WASL) 233, 234
Washington State, training needs of school assessment coordinators 231–243
Wordpower 214, 219
